

## COMMUNICATION & TECHNOLOGY

**Communication is key!**

"Technology has become embedded throughout society and has transformed the way we expect to engage with services and consume content. This is especially true for young people, where 46% of 5-15-year olds have their own smartphone, and 49% have their own tablet"

*2019 Realising the Potential of Technology in Education*

"Being able to communicate is the most important skill we need in life. Almost everything we do involves communication; everyday tasks such as learning at school, ordering food and drink, sorting out problems, making friends and having fun all rely on our ability to communicate with each other."

*Other Ways of Speaki*

**Communication & Technology** .....supporting access, inclusion and improved outcomes for all

**"Technology is part of our everyday lives. It can also support a child's communication"**

*Action For Children*

**This workshop** explores the importance of Visual Communication and use of Technology to enhance learning and development. We also share resources and apps to support inclusion for all and including engagement for children with Social Communication needs.
